

Web Page Design Considerations

Think about these things before beginning the production stage.

What are your goals? (2 or 3 most important)

Who is your audience? What do you want them to take away from your site?

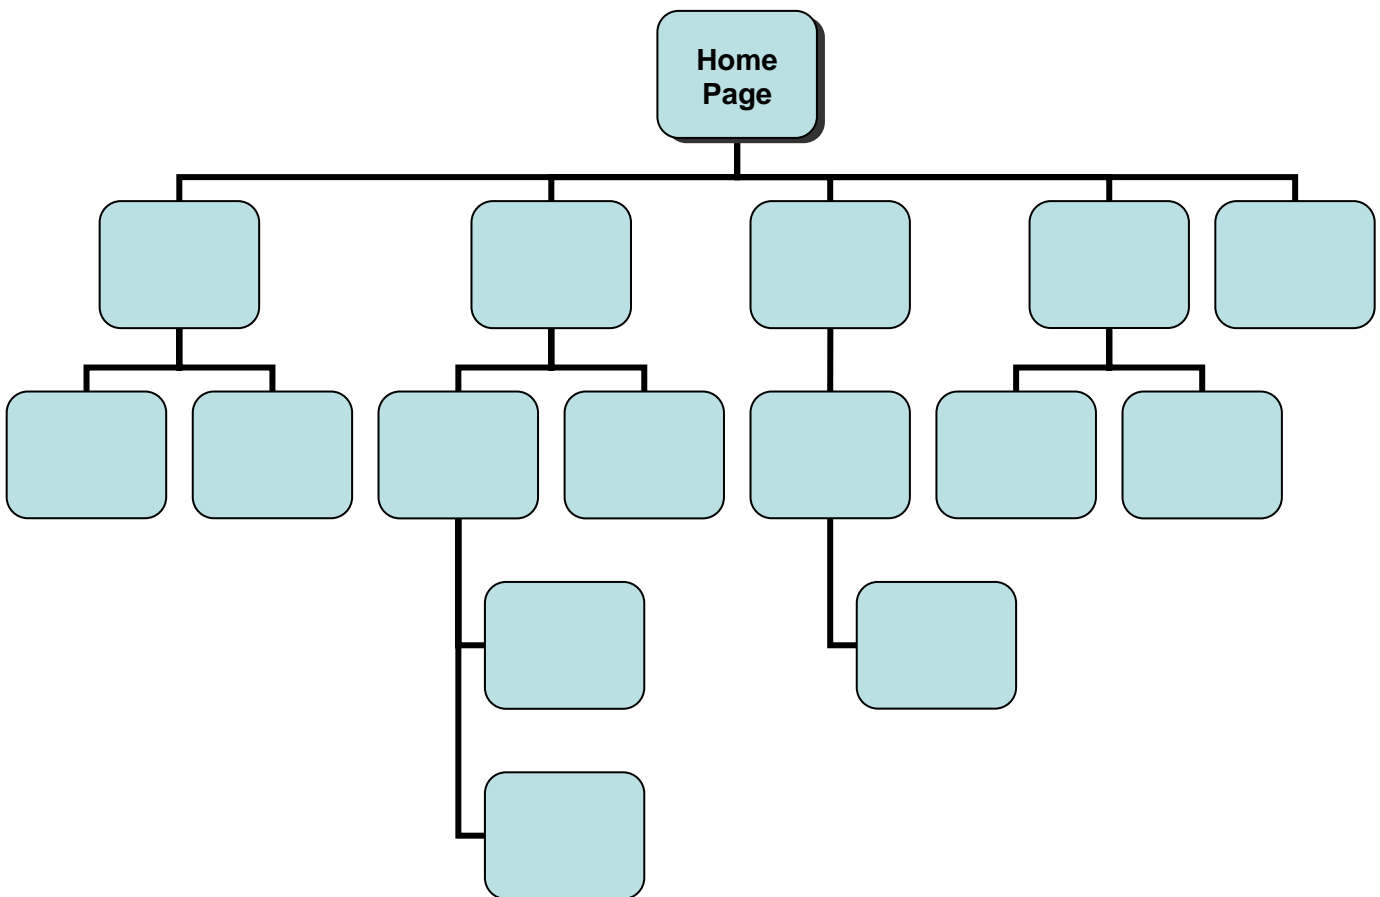

What content do you want to include? (Do you have all of this content and in an electronic format?)

What font and colors will be used?

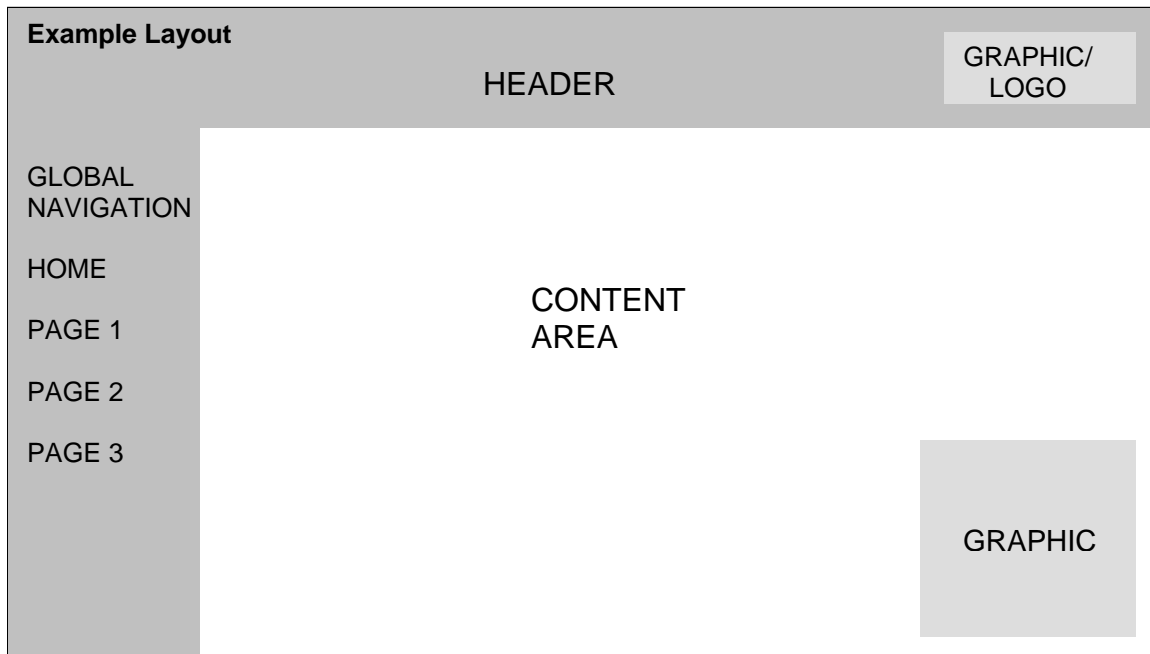

What graphical elements and images will be included?

How will the user navigate around the site? (ex: global navigation, breadcrumbs, site map)

Web Site Navigational Chart

Page Layout Plan

Use the box to layout a plan for your web page layout.

A large empty rectangular box provided for the user to create their own web page layout plan.
